AT LAST !

Here's a keychain that's excellent **QUALITY**, good weight, doesn't fade and can be imprinted with the information you want in great **DETAIL**.
 And best of all **NO MINIMUM QUANTITY**.

We have developed a system where we can produce a quality metal keychain at a very affordable price. We need good artwork to start with.

What's so great about these keychains ???

It's the detail. Previous generations of keychains had messages stamped on the reverse side which was always rather poor in readability and detail. This process allows many lines of information as well as logos, colour highlights etc. Just great to get a phone number always at the ready. And it's a quality item. Something that is not likely to be discarded. (unlike many cheap plastic items)

1 - 5	6 - 20	21- 50	50- 99	100 plus
\$9.00	\$7.50	\$5.90	\$4.90	ring

If you require individual names or numbers on each keychain, add 7c per keychain. No other art charges apply for setups unless we need to work on artwork you supply.

ARTWORK: We prefer a good quality .EPS file. Other formats such as .JPG, .TIF are also OK providing they are 2-3 times size of final image so that quality is not compromised. If provided on a graphics platform

This shows full size of backside of keychain showing fine detail which is quite readable.

This shows full size of frontside of keychain showing fine detail including metallic gold highlights which really enhance images.
